- Graphic and User Interface Design
- Strong Communication and Interpersonal Skills
- Eagerness to Learn New Technologies
- Source and Version Control: Git, GitHub
- RDMS Development and SQL
- QA Testing
- Hardware and Software Optimization

WORK HISTORY

JAVA FULL STACK DEVELOPER 04/2021 to CURRENT

Genspark | Atlanta, GA

- Modify existing software to correct errors, to adapt it to new hardware, or to upgrade interfaces and improve performance
- AStore, retrieve, and manipulate data for analysis of system capabilities and requirements
- Troubleshoot and Debug software at all stages, including both front and back-end development
- In the first half of my work at Genspark, I was mainly a front-end web developer, working on e-commerce applications for Walmart
- Later I was moved to be an arm of the QA team, where my responsibilities mainly consisted of debugging and testing parts of the Inventory Management System that Walmart uses for their warehouses.
- I received training, and worked with, Core Java, SQL, and QA Testing, as well as various front-end technologies such as HTML, CSS, and Javascript.

SONAR TECHNICIAN 02/2017 to 04/2021

United States Navy, FMF Corpsman

- Sonar Technicians are responsible for operating sonar systems, underwater fire control systems, and supporting equipment on both surface and submarine ships such as frigates, destroyers, and cruisers
- I was assigned to submarines and served aboard the USS Cheyanne for the first half of my short Navy career
- I later crossrated, or changed jobs, into a Fleet Marine Force Corpsman
- I was subsequently attached to a small squad of Marines and deployed to Yemen for 17 months
- Upon being injured in combat overseas, I returned home and left the service.

EDUCATION

Diploma 02/2017
High School
